

Thank you,

Senators Chambliss and Isakson, FOR PUTTING PATIENTS FIRST.

On behalf of the physicians who care for America's seniors, people with disabilities and military families, the American Medical Association and Medical Association of Georgia thank you for your help in passing the Medicare Improvements for Patients and Providers Act of 2008 last week and preserving access to care for our most vulnerable citizens.

You heard and heeded the voices of your constituents and were instrumental in passing this critical legislation. We sincerely appreciate your support and your commitment to putting patients first.
