

Dear all:

Please see the [notice for a webinar we are hosting tomorrow](#) addressing the Cares Act. Todd Askew (Senior Vice-President for Advocacy for the AMA) will discuss the key provisions. We have received a lot of questions on how this stimulus bill and others are impacting physician and their offices. AMA has been at the forefront of the conversations and representing all physicians during this time. AMA is keenly aware of the angst that all physicians are experiencing right now and are addressing the concerns. Because of AMA's work, MAG (and other state medical societies) are allowed to focus our initiatives on our respective states and what we can get done at that level.

On another note, this is why we need more physicians in Congress, especially in times like this. Georgia used to have three physicians in Congress and now we have none. This is why we need more physician leadership at the national level.

Looking forward to the discussion tomorrow night.

Donald
