

## **Primary Care Management of Adults with Sickle Cell Disease**

*Webinar Registration is [now open!](#)*

**Webinar Overview:** Adults with sickle cell disease have multiple conditions that impact the entire body. Thus, primary care physicians and their care teams need to be empowered with the knowledge and resources to give evidence-based person-centered care.

This webinar series will provide the foundational knowledge and discuss the availability of new regional assessments for care plan development, with telemedicine follow up. It is open to physicians, nurses, nurse practitioners, physician assistants, and medical assistants.

**Date & Time: Tuesday, July 2<sup>nd</sup> - 10:00am – 12:00pm ET**

**At the conclusion of this webinar, participants will be able to:**

- Understand how to care for the patient with sickle cell in the primary care setting.
- Understand how to manage pain in Sickle Cell Disease.
- Understand best practices in care coordination through the use of Community Health Workers and the clinical care team.
- Understand the process of telemedicine follow up.

### **Presenters:**
